

Many of the photographs in this book have been taken against backgrounds in the Cooper Union Museum, a symbol, if you will, of change. For the ownership of the Museum will be transferred shortly to the Smithsonian Institution who will operate it under the name of the Cooper-Hewitt Museum. From this advantageous change, the Museum gains a level of financial support not possible before, and Cooper Union will be able to devote the funds it employed for Museum maintenance to its major obligation—its educational programs.

In your tenure at this institution you have shared in other, more immediate, changes. Indeed, you yourself have altered from a hopeful questor of education. You have seen changes in Cooper Union, be they in curricula, faculty, or policies. For you and for Cooper Union there are changes—many of them—ahead of us. May I wish for you, as I wish for your alma mater, that they be met with confidence, perception, sensitivity, and wisdom.

Richard F. Humphreys
